

# QFM Dashboards

**Beta Software** - The QFM Dashboard software is provided at no cost for the beta version. Your feedback is extremely helpful in making this a more valuable tool for your operations and management.

## Dashboard Software FAQs

1. How does it work?
  - a. Once you have shared internet access with the QFM units, each unit sends telemetry data every 5 minutes, and checks for new settings every 15 minutes.
  - b. The website, [qfmonitoring.com](http://qfmonitoring.com), digests the telemetry data and displays it on Dashboards.
2. Who has access to the Dashboards?
  - a. Tippmann Engineering, some of its employees, and some necessary third party subcontractors.
  - b. You can decide whom at your company has access to individual Dashboards and devices.
3. How many Users/Dashboards can I have?
  - a. With the beta software we have not set any limits on users or number of Dashboards
4. How long is the data retained?
  - a. We have not instituted data expiration yet. This will change eventually.

## Dashboard Training FAQs
